Abstract

We introduce the BCFireCube, a harmonized datacube compiled to support wildfire research in British Columbia. Previous works have produced vital spatial data describing British Columbia's wildfires, ecology, geography, and social development. However, inconsistent data formatting, limited resource availability, and poor data interoperability hinder research. The BCFireCube addresses this barrier by modifying and harmonizing spatial data produced by the Government of British Columbia, Natural Resources Canada, and Statistics Canada. We provide spatial, ecological, and social data about wildfires from 1917 to 2025, in addition to 21 congruent raster layers and 3 vector files which contextualize British Columbia's wildfire regime. This harmonized data is available on the Borealis, the Canadian Dataverse Repository. The BCFireCube has a wide range of potential applications in wildfire science, wildfire economics, political ecology, and environmental risk modelling.

Wildfire Data

Point and Polygon Data

This file contains data values describing wildfires associated with both a fire point and a fire polygon.

File Name2026_bcfire_bothdata.csv

Observations12,590

Dataset Production Year 2026

Dataset Coverage Years 1950-2025

Variables
firelabel, label, date, igndate, outdate, burnlength, area_sqm, datasources, creationnotes, cause, fire_centre, fire_zone, firetype, responsetype, elevation, avgelevation, slope, avgslope, ownership, avgownership, landcover, avglancover, beccode, avgbeccode, ndtcode, avgndtcode, fueltype, avgfueltype, population, avgpopulation, dwellings, avgdwellings, forestage, avgforestage, biomass, avgbiomass

Variable Coverage Years
firelabel, label, date, igndate, outdate, burnlength, area_sqm, 1950-2025
datasources, creationnotes, cause, firetype, elevation, avgelevation, slope, avgslope
fire_centre, fire_zone 1989-2025
responsetype 2000-2025
population, avgpopulation, dwellings, avgdwellings 2002-2025
landcover, avglancover 2006-2024
beccode, avgbeccode, ndtcode, avgndtcode 2017-2025
fueltype, avgfueltype 2020-2025
forestage, avgforestage, biomass, avgbiomass 2021-2023
ownership, avgownership 2023-2025

Variable Descriptions
firelabel Official wildfire identifier. Formatted as YYYY-#####.
label Modified wildfire identifier. Differentiates between wildfires within the same complex. Formatted as YYYY-#####-#.
date Fire polygon recorded date. Formatted as YYYY-MM-DD.
igndate Fire point recorded ignition date. Formatted as YYYY-MM-DD.
outdate Fire point recorded fire out date. Formatted as YYYY-MM-DD.
burnlength Difference in days between igndate and outdate.

area_sqm	Fire polygon area in square metres.
datasource	Fire polygon recorded source of data upload method.
creationnotes	Fire polygon recorded additional information. Clarifies data source or potential inaccuracy.
cause	Recorded fire cause. All entries are “Human,” “Lightning,” or “Unknown.”
fire_centre	Fire point recorded fire centre.
fire_zone	Fire point recorded fire zone.
firetype	Fire point recorded fire type. All entries are “Fire” or “Nuisance Fire.”
responsetype	Fire point recorded response type. All entries are “Full,” “Modified,” or “Monitor.”
elevation	Fire point extracted elevation in metres.
avelevation	Fire polygon extracted mean elevation in metres.
slope	Fire point extracted slope in degrees.
avgslope	Fire polygon extracted mean slope in degrees.
ownership	Fire point extracted forest cover ownership code. See documentation table for specific values.
avgownership	Fire polygon extracted mode forest cover ownership code. See documentation table for specific values.
landcover	Fire point extracted land cover code. See documentation table for specific values.
avglandcover	Fire polygon extracted mode land cover code. See documentation table for specific values.
beccode	Fire point extracted biogeoclimatic zone and subzone code. See documentation table for specific values.
avgbeccode	Fire polygon extracted mode biogeoclimatic zone and subzone code. See documentation table for specific values.
ndtcode	Fire point extracted natural disturbance type code. See documentation table for specific values.
avgndtcode	Fire polygon extracted mode natural disturbance type code. See documentation table for specific values.
fueltype	Fire point extracted fuel type code. See documentation table for specific values.
avgfueltype	Fire polygon extracted mode fuel type code. See documentation table for specific values.
population	Fire point extracted population density in count per square kilometre. A uniform population distribution within census dissemination blocks is assumed.

avgpopulation	Fire polygon extracted mean population density in count per square kilometre. A uniform population distribution within census dissemination blocks is assumed.
dwellings	Fire point extracted dwelling density in count per square kilometre. A uniform dwelling distribution within census dissemination blocks is assumed.
avgdwellings	Fire polygon extracted mean dwelling density in count per square kilometre. A uniform dwelling distribution within census dissemination blocks is assumed.
forestage	Fire point extracted forest age in first growth year. A value of “1871” indicates that the forest began growing during or before 1871. A value of “0” indicates no forest cover.
avgforestage	Fire polygon extracted mode forest age in first growth year. A value of “1871” indicates that the forest began growing during or before 1871. A value of “0” indicates no forest cover.
biomass	Fire point extracted forest total biomass in tons per square kilometre.
avgbiomass	Fire polygon extracted mean forest total biomass in tons per square kilometre.

Raster Data

Dwellings

These files contain raster data describing the mean dwelling density in count per square kilometre within census dissemination blocks for the 2006, 2011, 2016, and 2021 censuses.

File Names
2006_bcrast_dwellings.nc, 2011_bcrast_dwellings.nc,
2016_bcrast_dwellings.nc, 2021_bcrast_dwellings.nc

Dataset Production Years2006, 2011, 2016, 2021

Variable dwellings

Variable Description
dwellings Mean dwelling density in count per square kilometre. A uniform dwelling distribution within census dissemination blocks is assumed.

Land Cover

These files contain raster data describing the land cover classes of British Columbia in 2010, 2015, and 2020.

File Names

2010_bcrast_landcover.csv, 2010_bcrast_landcover.nc,
2015_bcrast_landcover.csv, 2015_bcrast_landcover.nc,
2020_bcrast_landcover.csv, 2020_bcrast_landcover.nc

Dataset Production Years2010, 2015, 2020

Variables

landcover, Land.Cover.Class

Variable Descriptions

landcover Land cover code. See documentation table for specific values.
Land.Cover.Class Land cover code longname description. See documentation table for specific values.

Documentation Table

landcover	Land.Cover.Class
1	Temperate or sub-polar needleleaf forest
2	Sub-polar taiga needleleaf forest
5	Temperate or sub-polar broadleaf deciduous forest
6	Mixed forest
8	Temperate or sub-polar shrubland
10	Temperate or sub-polar grassland
11	Sub-polar or polar shrubland-lichen-moss
12	Sub-polar or polar grassland-lichen-moss
14	Wetland
15	Cropland
16	Barren land
17	Urban and built-up
18	Water
19	Snow and ice

Wildland-Urban Interface Buffer

This file contains raster data describing a two kilometre wildland-urban interface buffer around dense development in British Columbia.

File Name2020_bcrast_wui.nc

Dataset Production Year 2020

Variablewui

Variable Description
wui Binary variable describing the extent of a two kilometre wildland-urban interface buffer around dense development. A value of “1” indicates that the buffer is present.

Licence Information

Natural Disturbance Type

This file contains raster data describing the natural disturbance type classes of British Columbia.

File Names
2021_bcrast_ndt.csv, 2021_bcrast_ndt.nc

Dataset Production Year 2021

Variables
ndtcode, NTRL_DSTRD, NTRL_DSTRC

Variable Descriptions
ndtcode Natural disturbance type class code. See documentation table for specific values.
NTRL_DSTRD Natural disturbance type class index. See documentation table for specific values.
NTRL_DSTRC Natural disturbance type class description. See documentation table for specific values.

Documentation Table

ndtcode	NTRL_DSTRD	NTRL_DSTRC
1	NDT1	Ecosystems with rare stand-initiating events
2	NDT2	Ecosystems with infrequent stand-initiating events
3	NDT3	Ecosystems with frequent stand-initiating events
4	NDT4	Ecosystems with frequent stand-maintaining fires
5	NDT5	Alpine Tundra and Subalpine Parkland ecosystems

PSTA Fire Density

This file contains raster data describing the Provincial Strategic Threat Analysis modelled number of nearby historical fire incidents since 1950. Fires that are greater than four hectares in area are treated as one event. Fires that are greater than five hundred hectares are treated as five events.

File Names
2021_bcrast_pstafire.csv, 2021_bcrast_pstafire.nc

Dataset Production Year 2021

Variables
fire_density, FR_STRT_DY

Variable Descriptions
fire_density Code representing range of PSTA modelled number of fire starts since 1950. See documentation table for specific values.
FR_STRT_DY Range of PSTA modelled number of fire starts since 1950. See documentation table for specific values.

Documentation Table

fire_density	FR_STRT_DY
-1	Water
0	No Fires
1	1 - 5
2	5.1 – 10
3	10.1 – 17
4	17.1 – 24
5	24.1 – 33
6	33.1 – 45
7	45.1 – 60
8	60.1 – 82
9	82.1 – 116
10	>116

PSTA Head Fire Intensity

This file contains raster data describing the Provincial Strategic Threat Analysis modelled head fire intensity thresholds derived from 90th percentile fire weather index values in kilowatts per metre.

File Names
2021_bcrast_pstahead.csv, 2021_bcrast_pstahead.nc

Dataset Production Year 2021

Variables
hf_intensity, Head.Fire.Intensity.Class.Range

Variable Descriptions
hf_intensity Code representing range of PSTA modelled head fire intensity thresholds derived from 90th percentile fire weather index values in kilowatts per metre. See documentation table for specific values.
Head.Fire.Intensity.Class.Range Range of PSTA modelled head fire intensity thresholds derived from 90th percentile fire weather index values in kilowatts per metre. See documentation table for specific values.

Documentation Table	
hf_intensity	Head.Fire.Intensity.Class.Range
-3	No Data (Private Land)
-2	No Data (Private Managed Forest Land)
-1	Water
0	Non-Fuel
1	>0 to 1000 kW/m
2	>1000 to 2000 kW/m
3	>2000 to 4000 kW/m
4	>4000 to 6000 kW/m
5	>6000 to 10000 kW/m
6	>10000 to 18000 kW/m
7	>18000 to 30000 kW/m
8	>30000 to 60000 kW/m
9	>60000 to 100000 kW/m
10	>100000 kW/m

PSTA Human Fire Density

This file contains raster data describing the Provincial Strategic Threat Analysis modelled number of nearby human-caused historical fire incidents since 1950. Fires that are greater than four hectares in area are treated as one event. Fires that are greater than five hundred hectares are treated as five events.

File Names
2021_bcrast_pstahuman.csv, 2021_bcrast_pstahuman.nc

Dataset Production Year 2021

Variables
human_density, FR_STRT_DY

Variable Descriptions
human_density Code representing range of PSTA modelled number of human-caused fire starts since 1950. See documentation table for specific values.
FR_STRT_DY Range of PSTA modelled number of human-caused fire starts since 1950. See documentation table for specific values.

Documentation Table

human_density	FR_STRT_DY
-1	Water
0	No Fires
1	1 - 5
2	5.1 – 10
3	10.1 – 17
4	17.1 – 24
5	24.1 – 33
6	33.1 – 45
7	45.1 – 60
8	60.1 – 82
9	82.1 – 116
10	>116

PSTA Lightning Fire Density

This file contains raster data describing the Provincial Strategic Threat Analysis modelled number of nearby lightning-caused historical fire incidents since 1950. Fires that are greater than four hectares in area are treated as one event. Fires that are greater than five hundred hectares are treated as five events.

File Names
2021_bcrast_pstalighting.csv, 2021_bcrast_pstalighting.nc

Dataset Production Year 2021

Variables
lightning_density, FR_STRT_DY

Variable Descriptions
lightning_density Code representing range of PSTA modelled number of human-caused fire starts since 1950. See documentation table for specific values.
FR_STRT_DY Range of PSTA modelled number of human-caused fire starts since 1950. See documentation table for specific values.

Documentation Table	
lightning_density	FR_STRT_DY
-1	Water
0	No Fires
1	1 - 5
2	5.1 – 10
3	10.1 – 17
4	17.1 – 24
5	24.1 – 33

Forest Total Biomass

This file contains raster data describing the forest total biomass in tons per square kilometre.

File Name 2022_bcrast_biomass.nc

Dataset Production Year 2022

Variable biomass

Variable Description
biomass Forest total biomass in tons per square kilometre.

Licence Information
This file is licensed under CC BY 4.0: <https://creativecommons.org/licenses/by/4.0/>. Contains information licensed under the Open Government Licence—Canada.

Forest Age

This file contains raster data describing forest age in first growth year.

File Name2022_bcrast_forestage.nc

Dataset Production Year 2022

Variable forestage

Variable Description
 forestage Forest age in first growth year. A value of “1871” indicates that the forest began growing during or before 1871. A value of “0” indicates no forest cover.

Fuel Types

This file contains raster data describing the fuel types of British Columbia.

File Names
2024_bcrast_fueltypes.csv, 2024_bcrast_fueltypes.nc

Dataset Production Year 2024

Variables
fueltype, fuelname, fuellongname

Variable Descriptions
fueltype Fuel type code. See documentation table for specific values.
fuelname Fuel type abbreviated name. See documentation table for specific values.
fuellongname Fuel type longname. See documentation table for specific values.

Documentation Table

fueltype	fuelname	fuellongname
1	C1	C-1 Spruce-Lichen Woodland
2	C2	C-2 Boreal Spruce
3	C3	C-3 Mature Jack or Lodgepole Pine
4	C4	C-4 Immature Jack or Lodgepole Pine
5	C5	C-5 Red and White Pine
7	C7	C-7 Ponderosa Pine / Douglas Fir
11	D1	D-1 Leafless Aspen
13	D1/2	D-1/D-2 Aspen
31	O1	O-1a Matted Grass
101	Non-fuel	Non-fuel
102	Water	Water
105	Vegetated Non-fuel	Vegetated Non-fuel
415	M1 C15	M-1 Boreal Mixedwood - Leafless (15% Conifer)
625	M1/2 C25	M-1/M-2 Boreal Mixedwood (25% Conifer)
650	M1/2 C50	M-1/M-2 Boreal Mixedwood (50% Conifer)
675	M1/2 C75	M-1/M-2 Boreal Mixedwood (75% Conifer)

Forest Cover Ownership

This file contains raster data describing the forest cover ownership of British Columbia.

File Names
2024_bcrast_ownership.csv, 2024_bcrast_ownership.nc

Dataset Production Year 2024

Variables
ownership, Ownership.Description

Variable Descriptions
ownership Forest cover ownership code. See documentation table for specific values.
Ownership.Description Description of forest cover ownership. See documentation table for specific values.

Documentation Table	
ownership	Ownership.Description
40	Private
41	Private - Land Claim Settlement Area
50	Federal - Federal Reserve
51	Federal - National Park
52	Federal - Indian Reserve
53	Federal - Military Reserve
54	Federal - Dominion government Block/Federal Parcels
60	Crown - Conservancy Area, Ecological Reserve, Protected Area, Provincial Park
61	Crown - UREP (Use, Recreation and Enjoyment of the Public Reserve)
62	Crown - Forest Management Unit
63	Crown - Biodiversity, Mining, Tourism Area
64	Crown - Special Forest Management Area
65	Crown - Wildlife Management Area
66	Crown - Recreation Area

Differenced Normalized Burn Ratio

This file contains raster data describing the differenced Normalized Burn Ratio of burned areas throughout British Columbia.

File Name2026_bcrast_dnbr.nc

Dataset Production Year 2026

Variable dnbr

Variable Description
dnbr Differenced Normalized Burn Ratio value. A value of “-9999” corresponds to an unburned area.

Licence Information
This file is licensed under CC BY 4.0: <https://creativecommons.org/licenses/by/4.0/>. Contains information licensed under the Open Government Licence—Canada.

Salvage Logging

This file contains raster data describing whether salvage logging took place for locations in the National Burn Area Composite.

File Name2026_bcrast_salvagelogging.nc

Dataset Production Year 2026

Variable salvagelog

Variable Description
salvagelog Binary code representing the presence of salvage logging in a burned area. A value of “1” indicates that salvage logging was present.

Licence Information
This file is licensed under CC BY 4.0: <https://creativecommons.org/licenses/by/4.0/>. Contains information licensed under the Open Government Licence—Canada.
